

EXPOFIMER CONFERENCES 2023

March 8TH and 9TH, 2023

PUBLIC PETITIONS OF CONFERENCES AND SUMMARIES

EXPOFIMER 2023, Europe's only renewable asset management fair, organizes workshops and conferences in parallel to the exhibition in the pavilions of Feria de Zaragoza, with the aim of deepening the knowledge of the solutions and products to optimize the operation of the plants and achieve the expected technical and economic results.

The **Public Request** is organized for this convocatory, with the purpose of having a more complete vision of the different services and markets, as well as the forecasts for the future development.

The summaries will be organized in conferences, workshops and poster in the romos and places habilitated for that, and the following calendar is set:

Deadline date: November 30th 2022

Selection of the Proposals: December 22nd 2022

Program Publication: January 15th 2023

The presentation by topics is structured in groups that will be introduce here below:

MARKET:

- **Market situation and forecasts of the future growth**
- **New indicators of the plants results**
- **Lessons learned from solar market growth**
- **Agricultural use of solar sites**
- **Operational differences between plants with market sales/auction results**
- **Implications of EPC design for downstream services**
- **Quality of services**

COMPLEMENTARY SERVICES:

- Surveillance and safety of the plants
- Safety and health for people
- Cybersecurity
- Insurance, experiences in risk coverage

FORMATION:

- Main needs/shortcomings in the sector
- Professional background: gaps and improvements
- The usage of digital skills and virtual reality
- Women in asset management services

ADVANCED TOOLS:

- Extern components for plants monitorization
- Digitalization
- Production forecasts/short-term price forecasts

NEW OPPORTUNITIES:

- The storage maintenance
- Electrolyzers maintenance
- Repotenciation and "revamping" of plants
- Secondary markets and recycling of components

The resumes should have **less than 500 words**.
